(Hipshot Ultralites are highly recommended)

**Other Specifications**

A non-refundable deposit in the amount of half the cost of the instrument is required before design and construction begin. Xylem accepts cash, check and credit card payments via PayPal. Anthony will never sacrifice quality or rush construction to reach a deadline date of completion, but he will give you an estimated time to completion upon receipt of your deposit. Time to completion will vary depending on the nature of your instrument and the number of instruments on order. Anthony will mail or email you an image of the full-size drawing of your instrument for your approval before beginning construction.

Xylem will ship or deliver your instrument once it has been paid for in full. The customer is responsible for shipping and insurance fees.
